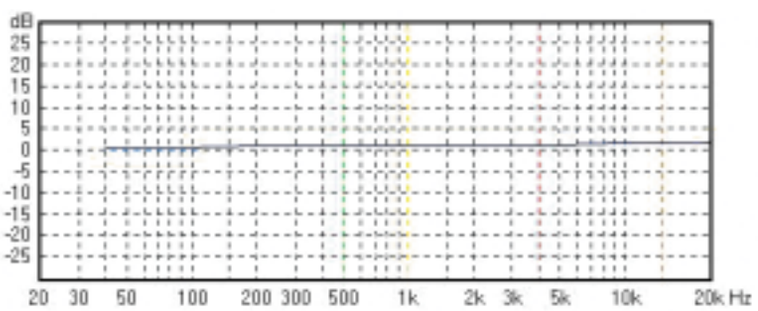
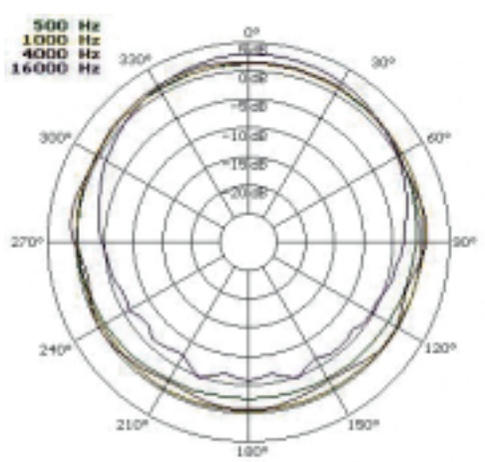
MBNM 550 EL

electret condenser microphone

measurement type

Primarily designed for calibration purposes, the MBNM 550 EL is an electret omni with superb linearity characteristics. As it is a neutral (+ 1 or - 0 dB) microphone with response at the tip nearly matching its response at the side or back, many prefer utilizing this microphone to minimize sound balance problems while recording solo instruments or voices in the near field. The capsule measures only 6 mm and works well with voltages from 16 - 48 V. Each MBNM 550 EL microphone is supplied with an individual test chart.





No. 92 - 5500

MBNM 608

triple patterned condenser large diaphragm

FIXED CAPSULE

Our large diaphragm three pattern is unique in that the vintage “lollipop” dual gold spluttered capsule assembly is coupled to a modern FET body. The precision brass backed diaphragm has the authoritative sonority associated with the massive classics of the past with the advantage of allowing use in areas that the behemoth microphones from yesteryear can only dream getting into. In omni the microphone has an impressive frequency range of 5 - 20.000 Hz, with the addition of accurate renderings of both the cardioid and figure of eight patterns. The precision components that comprise the MBNM 608 have tolerances in the μ-range. It is no wonder that a 40-year history of proven performance stands behind the MBNM 608. For a bigger than life amazing sound look no further!

MBNM 440 + MBNM 410

condenser cardioid + omni - small diaphragm

MBNM 440 + MBNM 410

FIXED CAPSULES

MBNM 440 & MBNM 410

Our compact body (85mm) true condenser type with integrated capsule and amplifier is available in two models, the MBNM 440 cardioid and the MBNM 410 omni. Using advanced SMD technology with an extremely short signal path and low phantom power consumption plus the ability to accept voltages from 22 to 48 V, these microphones are well suited for battery operation. With a non-reflective lacquered mat black housing, precise and stunning sound reproduction is available at an entry-level price.

The MBNM 440 S model features a switchable 10 dB pad and a high pass filter (No. 92 - 4401).

Matched pairs are available!

MBNM 630

true condenser PZM

MBNM 630

FIXED CAPSULE

The MBNM 630 is a half-cardioid true condenser PZM in an ultra compact sleek Nextel finish. The two component mat finish is non reflective. In addition to the non-skid pad on the bottom, the unit has a screwable housing made of solid brass. This model exhibits extreme stability and very low noise by any known reference. The MBNM 630 is essential in discrete settings where the highest quality is needed.

No. 92 - 6300

MBM 410 PZ

MBM 410 PZ

Theatre solution

The MBM 410 PZ offers easy handling solutions for smaller venues combined with an truly unbelievable sound image. The MBM 410 PZ proved to be the perfect microphone solution for venues such as theatres and conference rooms which do not employ full time sound engineers and the speaker/artist is often in charge of the sound system. The MBM 410 PZ is securely suspended by three safety mounting clips about 8 -10 feet above the sound source and the audio quality provide by this PZM is purely stunning. One to four different MBM 410 PZ may be used to cover larger recording areas such in as larger stages or conference centres etc. The MBM 410 PZ comes in an inconspicuous gray lacquered finish and incluedes one MBNM 410.

MBP 648 PZ

MBP 648 PZ MODULAR SYSTEM

condenser PZM

A pressure zone microphone as pressure gradient receiver is used more and more where a discrete recording is to be made in the highest quality. Direct sound is 3 dB more sensitive than diffused sound (due to pressure duplication the output voltage at a pressure zone greater than 1 m² is increased by 6 dB, the directional diagram is halfed). Thanks to easy exchange of the capsules, the sound engineer has all application possibilities on hand. Using a hypercardiod capsule yields a remarkable range of results which are quite valuable for live broadcasting. Due to the remote impedance transformer, the PZM can use all MBHO capsules optimally and discretely. The microphone is mounted on a marble plate which has a non-slip pad at the back.

No. 92 - 6484

MBNM 620 PZ

MBNM 620 PZ FIXED CAPSULE

electret condenser PZM

The little sister of the MBP 648 PZ. This electret condenser microphone uses the same philosophy than the MBP 648. When the pressure zone is large enough, lowest frequencies are brilliantly reproduced. Direct sound is 3 dB more predominant than diffused sound and the directional diagram is halved.
The electric parameters nearly reach those of true condenser microphones. So a very professional and inexpensive solution has been found. This microphone is also mounted on a marble plate which has a non-slip pad at the back.

MBNM 621 E PZ

mono PZM electret condenser

With room acoustics in mind, a classic PZM microphone that may be laid on the floor in front of the source was developed. The microphone performs over a wide voltage range (from 10 to 48 V) has a symmetrical design and includes an XLR connector. This product imparts excellent transient response plus extremely wide, smooth frequency response.

Press: DRUM! Magazine June 2001 MBNM 622:

MBNM 622 E PZ

stereo PZM electret condenser

An MBHO original, the MBNM 622 PZM is based on the Jecklin disc. The Jecklin disc provides a natural stereophony, combining the hemispherical attributes of the planer (PZM). The MBNM 622 has become a standard for recording high quality samples. In many cases this stereo PZM can replace the need for conventional microphones. Voltages from 10 to 48 V are accommodated with XLR connectors on each output. Performance that truly belies the entry-level price, point and shoot!

MBP 648 S MODULAR SYSTEM

MBP 648 S

goosenecks

modular true condenser system

The **true condenser** gooseneck is a complimentary part of our modular system. The standard configuration includes the KA 400 capsule mounted. This capsule is pre-adjusted for the speech proximity effect with a 12 dB cut at 50 Hz. As with most of our line, the MBP 648 S may be supplied with a mat black or non-reflectively plated nickel finish.

The stock item is supplied in a 250 mm length with an XLR connector, while a 3/8" threaded sleeve lateral outlet version with an open-ended 3 m cable is available upon request. You will not find a superior podium microphone!

specifications

standard pattern	cardioid (KA 400)

MBNM 150 EN FIXED CAPSULE

MBNM 150 EN

electret condenser microphone in nextel design

The MBNM 150 EN represents the sum total of our exhaustive research into just what would represent the "perfect electret podium microphone". The electret cardioid capsule is mounted on a fully adjustable gooseneck. The 12 mm fixed capsule has extraordinarily well off axis rejection with built in compensation for the proximity effect. Sleek industrial design with a gray Nextel finish make the microphone seems as visually transparent as it sounds! While an XLR serves as the output connector, the microphone can shipped with a 3/8" threaded sleeve with a lateral outlet and a 3 m cable to the preamp. A wide voltage range is accommodated with extremely stable operating results.

MBP 648 HS

modular true condenser headset incl. headphone

MBP 648 HS

MODULAR SYSTEM

This unique system consists of an amplifier unit and a small, remote condenser capsule with impedance transformer. The microphone capsule has a diameter of 21 mm, the elastic suspension a diameter of 35 mm. The capsule may be exchanged, allowing for the choices of the KA 400 cardioid, the KA 500 hypercardioid and the KA 100 omni. With these pick-up pattern options a true studio quality condenser microphone as a headset is now available. The headset performs well with phantom power ranging from 12 to 48 V. A highly effective wind screen and a -10 dB pad are available as accessories.
A magical HiFi sound.

Illustration shows the MBP 648 HS with the standard supplied KA 400 cardioid capsule & the MB Quart headphone QP 250.

That microphone system can be mounted on different headphones as well!

MBP 603 A ST

boom stand soloist microphone

The MBP 603 A ST is an autonomous boom stand version of our successful MBP 603 A microphone. Incorporating the KA 400 capsule “optimized for vocals”, we can guarantee extraordinary results revealing clarity and dynamic range that no wireless microphone can match!

In situations where the soloist must be seen and the highest sound reproduction is a necessity, this is your choice. Any MBHO capsule may be utilized to customize the application. A sleek high quality design highlights the mat “camera friendly” finish.

This product will accomplish the task while not being least bit imposing.

OSS DISCS

unique discs

What you are looking at is not an extraterrestrial spacecraft but a "Schneider disc". The Schneider disc is a variation of the Jecklin disc developed by Jürgen Jecklin for his stereo microphone technique known as Optimal Stereo Signal (OSS). The idea behind OSS is to use a pair of spaced omnidirectional microphones approximately 6 inches apart (roughly the distance between the human ears) with a disc placed in between the spaced pair. The disc is covered with a thin layer of foam intended to absorb high frequencies - thus improving stereo separation between the microphones. The difference between the two types of discs is the foam sphere at the center of the Schneider disc, which reduces the amount of high-frequency energy reflected from the disc, and results in an increase of stereo separation. Below approximately 200 Hz, the Schneider disc has little (if any) effect on the stereo signal because the audio wavelength is large enough to bend around the disc, equally reaching both microphones. However as frequency increases above 200 Hz, the Schneider disc's foam sphere increases stereo separation between the spaced pair.

Jecklin disc
No. 99 - 7000

USER TIP:

The Schneider disc may be used in OSS technique for stereo recordings of orchestral or chamber music, as well as for stereo micing of solo instruments. In order to properly implement OSS, the microphones should be identical, omnidirectional and should be set for equal output to avoid unbalancing of the stereo image (this can be checked using headphones). For the best balance between direct and room sound, the Schneider disc should be located at the distance from the source where the direct sound and the diffuse sound from the room are at equal strength. This distance is known as the diffuse-field distance and can be located by careful listening.

Schneider disc

MBP 603

preamps

MBP 603 MODULAR SYSTEM

The highly efficient MBP 603 microphone amplifier has a sophisticated circuit comprised of an audio amplifier and a DC converter. The entire range of modular capsules can be accommodated for full system usage.
The **transformerless** circuit utilizes a symmetrical output stage for higher dynamic range, extremely low coloration and very low harmonic distortion. Operating voltages range from 16 to 48 V with stable results.
In a word, pristine.

Press: "The 603 / 200 (KA 200 cardioid capsule) would be a genuinely useful all-round workhorse, covering all the bases very competently and giving good results on virtually everything." Dave Foister, Prosound Magazine

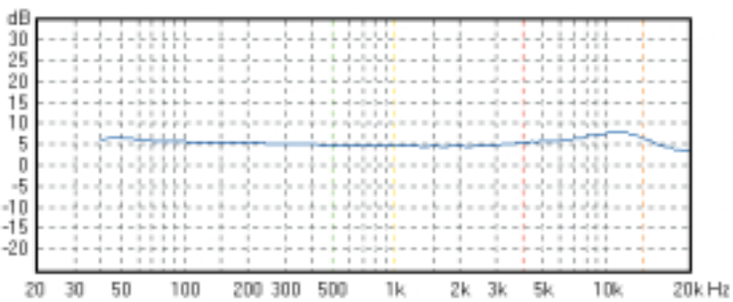
KA 100 LK - linear omni

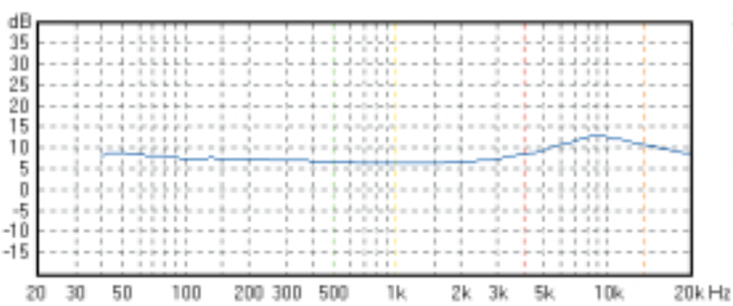


No. 82 - 3000

KA 100 LK			
recommended preamp	MBP 603 (A)	MBP 680	MBP 648 (A)
frequency response Hz	10 - 20.000	10 - 20.000	10 - 20.000
sensivity	12 mV/Pa	6 mV/Pa	6 mV/Pa
signal to noise ratio CCIR	68 dB	62 dB	67 dB
equivalent SPL rated at CCIR	26 dB	32 dB	27 dB
signal to noise ratio DIN/ IEC	80 dB	75 dB	80 dB
equivalent SPL rated at DIN / IEC	14 dB	19 dB	14 dB
max. spl	132 dB	132 dB	132 dB
size			ø 21 x 20 mm

A constant frequency response if the sound impinges frontally upon the capsule. This leads to a natural tonal response. With a non-axis impingement of sound upon the microphone, a decay of treble results. This effect is relevant when sound quotas come from other angles than 0°, for instance by reflections.

KA 100 DK - omni

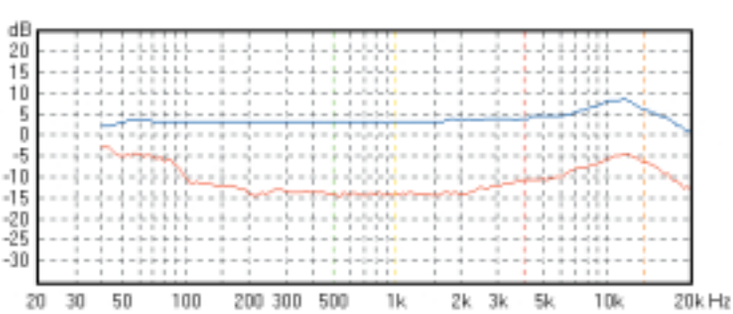


No. 82 - 3010

KA 100 DK			
recommended preamp	MBP 603 (A)	MBP 680	MBP 648 (A)
frequency response Hz	10 - 20.000	10 - 20.000	10 - 20.000
sensivity	12 mV/Pa	6 mV/Pa	6 mV/Pa
signal to noise ratio CCIR	68 dB	62 dB	67 dB
equivalent SPL rated at CCIR	26 dB	32 dB	27 dB
signal to noise ratio DIN/ IEC	80 dB	75 dB	80 dB
equivalent SPL rated at DIN / IEC	14 dB	19 dB	14 dB
max. spl	132 dB	132 dB	132 dB
size			ø 21 x 20 mm

- omni pattern
- features 6 dB peak at 8-9 kHz for more distant pickup
- recommended for outdoor recordings if less directivity is desired
- frequency response 10 - 20.000 Hz

KA 300 NB - wide cardioid

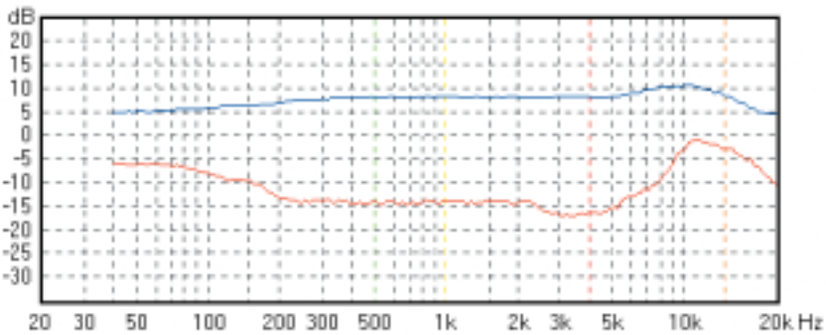


No. 82 - 3030

KA 300 NB			
recommended preamp	MBP 603 (A)	MBP 680	MBP 648 (A)
frequency response Hz	20 - 20.000	20 - 20.000	20 - 20.000
sensitivity	12 mV/Pa	6 mV/Pa	6 mV/Pa
signal to noise ratio CCIR	68 dB	62 dB	67 dB
equivalent SPL rated at CCIR	26 dB	32 dB	27 dB
signal to noise ratio at DIN / IEC	80 dB	75 dB	80 dB
equivalent SPL rated at DIN / IEC	14 dB	19 dB	14 dB
max. SPL	130 dB	130 dB	130 dB
size			ø 21 x 20 mm

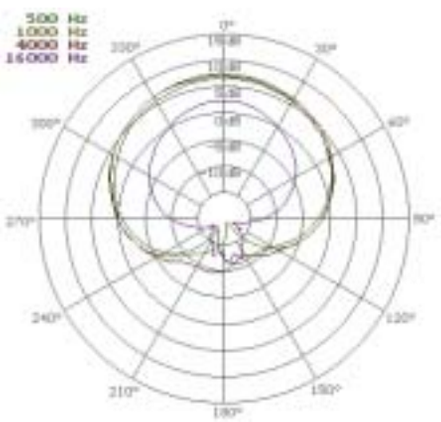
- wide cardioid pattern
- slight increase in low-frequency reproduction (compared to KA 200)
- frequency response 20 - 20.000 Hz

KA 200 N - cardioid



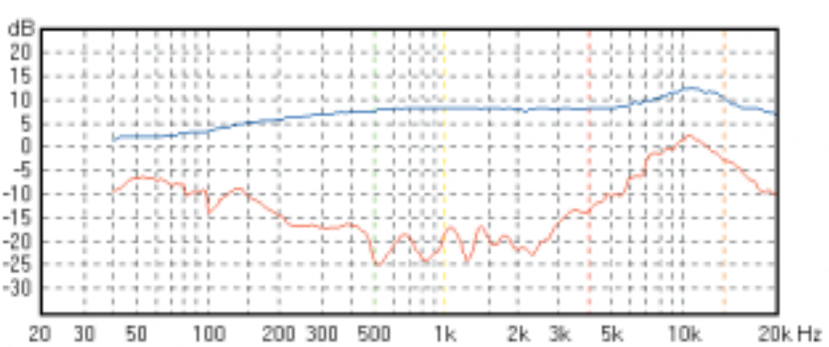
No. 82 - 3020

KA 200 N cardioid			
recommended preamp	MBP 603 (A)	MBP 680	MBP 648 (A)
frequency response Hz	40 - 20.000	40 - 20.000	40 - 20.000
sensitivity	14 mV/Pa	7 mV/Pa	7 mV/Pa
signal to noise ratio CCIR	69 dB	63 dB	68 dB
equivalent SPL rated at CCIR	25 dB	31 dB	26 dB
signal to noise ratio DIN / IEC	82 dB	76 dB	81 dB
equivalent SPL rated at DIN / IEC	12 dB	18 dB	13 dB
max. spl	130 dB	130 dB	130 dB
size			ø 21 x 20 mm



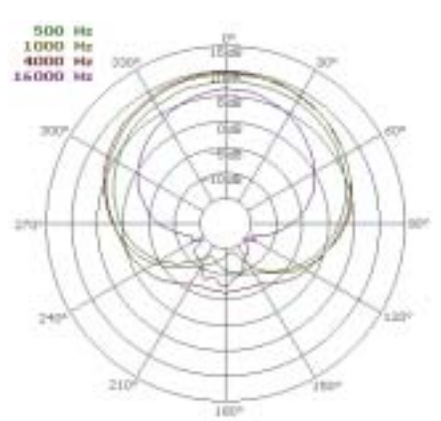
- cardioid pattern
- highly versatile capsule
- maximum rejection on rear-incident sound
- X/Y recordings or Mid-Side configuration
- frequency response 40 - 20.000 Hz
- neutral record space ± 135°

KA 400 N - cardioid



No. 82 - 3040

KA 400 N cardioid			
recommended preamp	MBP 603 (A)	MBP 680	MBP 648 (A)
frequency response Hz	50 - 20.000	50 - 20.000	50 - 20.000
sensitivity	15 mV/Pa	7 mV/Pa	7 mV/Pa
signal to noise ratio CCIR	70 dB	63 dB	68 dB
equivalent SPL rated at CCIR	24 dB	31 dB	26 dB
signal to noise ratio DIN / IEC	83 dB	76 dB	81 dB
equivalent SPL rated at DIN / IEC	11 dB	18 dB	13 dB
max. SPL	131 dB	131 dB	131 dB
size			ø 21 x 20 mm

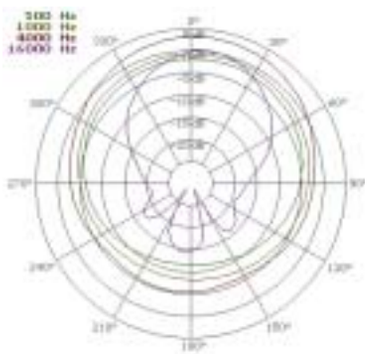


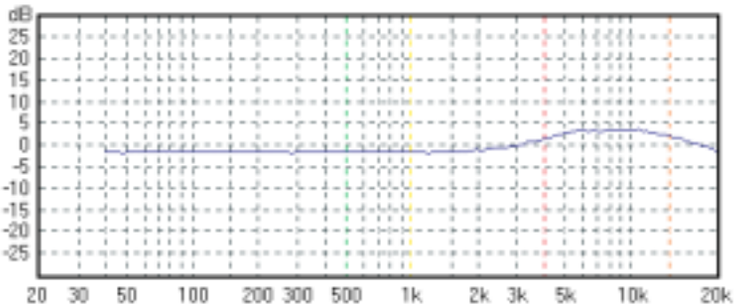
- cardioid speech optimized
- 12 dB low cut at 50 Hz
- frequency response 50 - 20.000 Hz

MBHO GmbH Im Valtert 39 D-74847 Obrigheim phone: +49 6261 7970 fax: - 7110 e-mail: info@mbho.de

KA 1000 N - large diaphragm cardioid

Our large diaphragm capsule with cardioid characteristic is an ideal solution for recording of singers, choirs, piano, saxophone and guitar. The pleasing warm sound has a fine-drawing, nice and airy effect. The vintage capsule design features gold sputtered membran and brass back plate.





KA 1000 N

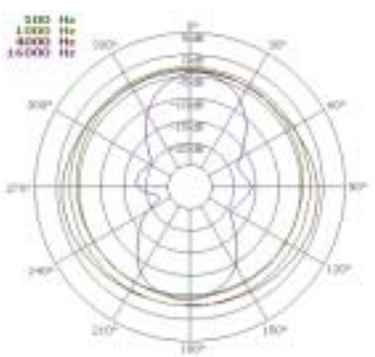
No. 82 - 3070

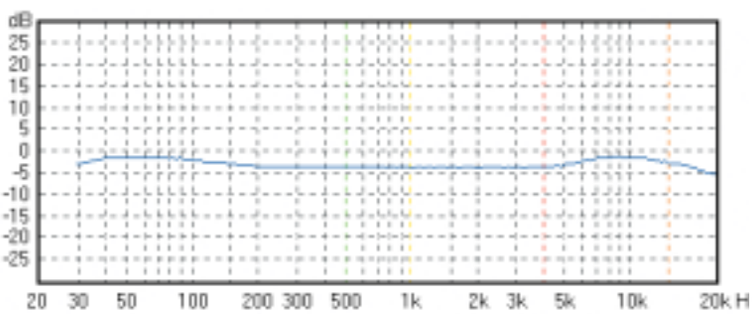
specifications

KA 1000 N		
recommended preamp	MBP 603 (A)	MBP 648 (A)
frequency response	10 - 20.000 Hz	10 - 20.000 Hz
sensitivity	11 mV/Pa	11 mV/Pa
signal to noise ratio CCIR	67 dB	67 dB
equivalent SPL rated at CCIR	27 dB	27 dB
signal to noise ratio DIN/IEC	79 dB	79 dB
equivalent SPL rated at DIN/IEC	15 dB	15 dB
max. spl	132 dB	132 dB
size		ø 50 x 20 mm

KA 1100 K - large diaphragm omni

The 35 mm double-diaphragm system with gold sputtered polyester foil 6 µm is manufactured with precision and tolerances in the µ-range. Recordings sound particularly precise.





KA 1100 K

No. 82 - 3080

specifications

KA 1100 K		
recommended preamp	MBP 603 (A)	MBP 648 (A)
frequency response	5 - 20.000 Hz	5 - 20.000 Hz
sensitivity	11 mV/Pa	11 mV/Pa
signal to noise ratio CCIR	67 dB	67 dB
equivalent SPL rated at CCIR	27 dB	27 dB
signal to noise ratio DIN/IEC	79 dB	79 dB
equivalent SPL rated at DIN/IEC	15 dB	15 dB
max. spl	132 dB	132 dB
size		ø 50 x 20 mm

MBD 219 Series

dynamic line

MBD 219 DYNAMIC MICROPHONES

With more than 30 years of experience fabricating high-end condenser microphones, we saw the need for a similar “no holds barred”, approach with our dynamic line. The rules here call for linearity without high frequency peaks, minimum proximity effect, high directivity and reduced handling noise. To this end we added a hand-optimized aluminum housing with the further advantage of internal shock mounting. The surface of the microphone is finished in non-reflective Nextel. Extreme high quality in fit and finish denote this product from the competition. We offer the MBD 219 series in three models, the MBD 219 C - cardioid, the MBD 219 SC - hypercardioid and the MBD 219 O - omni.

HKD - Nextel designed
clamp No. 99 - 8075

engraved logo and
individuell engraved number

Each microphone is supplied in a suit case.

MBD 219 C No. 92 - 2190
MBD 219 SC No. 92 - 2191
MBD 219 O No. 92 - 2192

specifications

model	MBD 219 C	MBD 219 SC	MBD 219 O
polar pattern	cardioid	hypercardioid	omni
frequency response Hz	50 - 16.000	40 - 20.000	40 - 18.000
sensitivity of field idling	0,15mV/µbar	0,16mV/µbar	0,13mV/µbar
1 kΩ at 1 kHz	1,5 mV/Pa±3dB	1,6 mV/Pa±3dB	1,3 mV/Pa±3dB
electrical impedance	200 Ω	200 Ω	200 Ω
connector	XLR	XLR	XLR
size each	200 mm x 51 mm		
weight each	295 g		

Tip:
In any live application where a rugged “state of the art” dynamic is the call, the MBD 219 will surpass your expectations.

Press:
" ..they deserve to be more widely known, as anybody using existing dynamic vocal microphones in the usual variety of ways ought to give them a listen.”
Dave Foister, Studio Magazine Dec/2000
